How is a dental laser used for periodontal therapy?

A number of dental practitioners are interested in efficacy of utilizing a dental laser for periodontal therapy. There are a multitude of proposed strategies for the use of a dental laser for this purpose. Consequently, more needs to be known about the type of dental lasers and the manner by which they are being used by clinicians.

Please complete the 7 question poll regarding utilization of dental laser in your practice.

Thank you for taking time to respond. Your response will help determine whether to consider this for a network study.

To access the poll, go to "Dental Laser Quick Poll" under Quick Links on the left hand side of this email.

Poll closes August 5th!
