

Table A4. Baseline characteristics of study subjects included in the data analyses for the paper "Patient-level and practice-level characteristics associated with receipt of preventive dental services: 48-month incidence"

	Weighted n (total of n = 597)	%
Age		
45-64 years	341	57
≥65 years	256	43
Gender		
Male	258	43
Female	339	57
Area of residence		
Rural	295	49
Urban	302	51
Race		
non-Hispanic White	479	80
non-Hispanic Black	118	20
Level of formal education		
Did not complete high school	85	14
Completed high school or above	511	86
Able to pay an unexpected \$500 dental bill		
Able to pay comfortably	323	54
Able to pay, but with difficulty	229	38
Not able to pay	44	7
Dental insurance status		
Has dental insurance	216	36
No dental insurance	380	64
Smoking status		
Current smoker	275	46
Former smoker	230	39
Never smoked	91	15
Household income		
Below \$20,000	215	37
At or above \$20,000	360	63
Household income relative to household size-based poverty level		
Not below poverty level	504	88
Below poverty level	67	12
Household income relative to household size-based 150% of poverty level		
Not below 150% poverty level	396	72
Below 150% of the poverty level	154	28
Present financial situation		
I really can't make ends meet	10	2
I manage to get by	232	39
I have enough to manage, plus some extra	237	40
Money is not much of a problem	110	19
