## QuickPoll

### [COVID-19 in Dentistry](#)

On March 11, 2020, the Novel Coronavirus Disease, COVID-19, was declared a pandemic by the World Health Organization. While many factors influence access to dental care, none in the recent past has been as significant as the global Coronavirus disease 2019 (COVID -19) pandemic that has disrupted dental practices worldwide. To mitigate the transmission of COVID-19, dental practices have made several changes to their physical layouts and processes of care.

We invite you to participate in this [Quick Poll](#), which will enable us to obtain insights on how dentists and dental practices are adapting to the COVID-19 pandemic.
