### [How Do You Remove All-Ceramic Restorations?](#)

Some operative procedures to remove all-ceramic restorations are considered tedious, expensive, and time-consuming. They may also lead to inadvertent removal of underlying tooth structure and harm surrounding soft tissue. Some research has shown the potential effectiveness of lasers for this purpose. This 5-question Quick Poll aims to determine how commonly practitioners encounter this removal scenario and their experiences.

Please take a few moments to complete this [Quick Poll](#) to help us determine if this would be a possible future study in the Network.
